ABOUT MYSELF

A self taught developer with a passion to continuously learn new things and be challenged in an educational environment. Striving to create clean applications with meticulous attention to detail and user experience. Seeking a developer role where I can continue to grow and hone my skills while having the opportunity to learn new technologies and be challenged. Additionally, a friendly environment that has a great culture and promotes team member success through mentorship and team work.

PROFESSIONAL SKILLS

❖ Proficient in JavaScript with strong frontend library experience in React JS and state management libraries like Redux.
❖ Knowledgeable in NodeJS and Express.
❖ Experienced with MongoDB.
❖ Ability to create full stack applications - MERN Stack.
❖ Strong HTML/CSS, SASS front end web design/styling skills.
❖ Experienced with Javascript testing (Jest Framework).
❖ Proficient in Git/Github.
❖ Proficient in REST API handling.
❖ Project deployment experience with Heroku/Firebase.
❖ Experienced with OAuth 2.0 protocol.

EDUCATION

Waterloo University
❖ Bachelor of Sciences   2012-2016

WORK EXPERIENCE

Greenergy
Pricing Administrator   2018-Present
❖ Develop and implement reporting mechanism to analyze market performance used by senior leadership (Director of Pricing), increasing efficiency by saving 10+ hours weekly
❖ Utilize market strategies to manage fuel price changes for over 100 sites across Canada.
❖ Communicate cross functionality with internal and external stakeholders to help achieve execution excellence in a quick and timely manner.

Louis Vuitton   2016-2017
Stock and Logistics
❖ Managed 50+ shipments, inbound/outbound daily with detailed cataloguing.
❖ Assisted with product placement and visuals.
❖ Handled and tasked with the charge of $10,000+ worth of shipment to clients, and other LV locations.
❖ Maintained SKU tracking system.
❖ Provided suggestions and insight for client production promotion, surpassing prior monthly sale goals.
❖ Communicated and interacted daily with clients/customers for product promotion.

Movie Finder
❖ A streamlined movie app for ratings and similar movies without the unnecessary clutter of information.
❖ A focus on clean, customized, eye grabbing design for each movie page.
❖ React, JS, APIs, SASS, HTML5 Github

Live app at: https://clucian.github.io/movie-db/

The Exercise Dictionary
❖ A workout app detailed with the major muscle groups of the body.
    o Select your muscle group for information and a list of exercises to choose from.
    o Create a workout plan and add exercises to your workout plan.
❖ An emphasis on user friendliness to navigate app
❖ React, JS, APIs, SASS, HTML5 Github

Live app at: https://clucian.github.io/workout-app/

Reddit but clean
❖ A redesigned version of reddit that is more smooth and elegant than the real thing!
❖ React, JS, APIs, SASS, HTML5, 3 Legged Oauth, Express, Node, Heroku, Github

Live app at: https://stormy-plains-06598.herokuapp.com/
(takes a few seconds to load)
